Sol Passion Music has been operating since 2012, with over 2000 students completing courses in DJ performance and music making / production. We already work with several Hong Kong based educational institutions to provide on-site and off-site partnered courses.

SUMMER BEAT CAMP - Learn to DJ!

Turn the music you love into seamless mixes you can share. In the five days, you will learn how to master mixing techniques—learning real DJ skills on gear you see online used by other DJs. It's a blast, and you will finish the week with your own custom mix to show off to friends. It is the perfect summer upgrade: a creative, screen-smart skill that builds timing, focus, and confidence. No experience needed, just a passion for great music. Your Week, Your Mix. Let's Go!

Students will:

- Learn DJ foundations: rhythm, beatmatching, transitions, and track selection
- Explore creative mixing and performance skills
- Cultivate an agile, creative mindset by mastering both performance and creation

What to Bring:

Just a laptop and headphones—your personal creative toolkit.

Ted Talks: Storytelling & Presenting
Take Charge! Leading as a CEO

Ivy Camp USA is in a league of its own! Classes are taught by instructors from Top 10 US Universities such as Harvard, Princeton and Yale. Ivy Kids offers a pioneering curriculum and engaging activities designed by specialists with over 40 years of experience in education.

Take Charge! Leading as a CEO

This camp focuses on what happens after business exists — how leaders run it. Students work as a company team with defined roles such as CEO, production manager, marketing director, and finance lead. They organize workflow, manage inventory, make group decisions, and solve real operational challenges like pricing changes, customer complaints, and time pressure. Students learn that successful businesses depend not only on good ideas, but on leadership, teamwork, and smart decision-making. * **laptop required**

AI Futurepreneur: Smart Innovation Challenge

Students take on the roles of Social Entrepreneurs and young CEOs, addressing UN Sustainable Development Goals (SDGs) through tech innovation. They research global challenges, create prototypes with Micro:bit, and pitch their ideas in a final «Shark Tank» showcase.

Dates: Week 3 (July 13 - 17)

Ages: 12+

Time: 13:00 - 15:00

Fee: \$3150

AI Frontier: The Future Explorers Program

AI Frontier immerses students as AI Explorers, uncovering the workings of Machine Learning, Computer Vision, and Natural Language Processing through hands-on experiments and ethical workshops. The program prepares them to use AI responsibly and effectively as a force for good.

Dates: Week 4 (July 20 - 24)

Ages: 9+

Time: 13:00 - 15:00

Fee: \$3150

Minecraft Smart City Architect

This course merges Minecraft fun with real-world engineering, focusing on smart city concepts like sustainability and efficient transport. Students will use block-based coding to design and build intelligent cities in the game, combining creativity and logic.

Dates: Week 6 (Aug 3 - 7)

Ages: 9+

Time: 10:00 - 12:00

Fee: \$3150

Roblox Developer: Lua & AI Integration

Learn Lua to develop custom game logic and utilize AI tools for rapid asset creation. Design and script a high-quality Obby, and discover how to polish and publish your game online.

Dates: Week 7 (Aug 10 - 14)

Ages: 12+

Time: 10:00 - 12:00

PRESS START

Press Start Academy's award-winning creative writing programs immerse students aged 4-11 in a game-based environment that encourages creativity, critical thinking, reading, speaking, and writing.

The Dragon's Breath: A Creative Writing Quest

In this interactive creative writing adventure, students journey to the mountains next to the ancient town of Orrinshire to uncover its long-buried mysteries. Students will develop their descriptive writing vocabulary and ignite their imaginations and problem-solving skills.

Dates: Week 2 (July 6 - 10)

Ages: 8 - 11

Time: 13:00 - 15:00

Fee: \$2310

Intergalactic Invasion: A Creative Storytelling Adventure

In this exciting space adventure, students take on the roles of adventurers who need to protect our planet from intergalactic threats. Throughout the course, they will build up science-based vocabulary and ignite their imaginations to practice their creative writing skills.

Dates: Week 3 (July 13 - 17)

Ages: 6 - 8

Time: 10:30-12:00

Fee: \$1733

Write on the Case: A Creative Journalism Quest

This interactive journalism program has students take on the role of intrepid young reporters, embarking on a series of exciting missions as they investigate intriguing cases. Students will learn how to ask questions, construct journalistic pieces, edit their writing, and everything in between.

Dates: Week 4 (July 20 - 24)

Ages: 8 - 11

Time: 13:00 - 15:00

Fee: \$2310

The Vases' Tale: A Creative Storytelling Adventure

As our student adventurers help a clumsy shopkeeper rearrange and rediscover fantastical stories stored inside her vases, they will be exploring distant lands and meeting the characters from these stories.

Digital Technology

TLC Kids offers fun and educational extracurricular classes, including Maths & Science, Creative Computing, and Inline-Skating & Skateboarding. We promote effort, determination, and positive self-belief. Together, we create a world of self-motivated learners who are brave, resilient, and ready to tackle challenges!

***Students will use their own laptops in class. Equipment can be provided if requested in advance.**

Digital Technology Multi-Skill

Get ready for exciting, creative theme-based computer and tech projects!

This computer skills program provides our pupils with a solid foundation alongside the skills and confidence to fully utilise ICT at school and at home. Our classes will have topical activities designed to engage their creativity and keep them up-to-date with current trends in our rapidly changing digital world.

Some examples of topics include:

- Image Editing
- 3D Modelling
- Animation
- Music Creation
- Programming
- Simulations
- A.I and Neural Networks

Engineering Explorers

Hands-on, discovery-based learning with maths, science & engineering experiments.

Designed for aspiring engineers and problem solvers, this course explores the interconnections between maths, science, and engineering principles. Students will delve into a wide range of topics in physics, architecture, electrical engineering, and materials science, to solve real-world engineering challenges and work on engaging projects that simulate the engineering design process. Each day will be a new activity and students will gain a deep understanding of how maths and science principles are foundational to engineering innovations.

Some examples of our learning topics include:

Boat Design and Buoyancy

- Motors, Electromagnetism and Circuits
- Bridge Building Challenge
- Parachutes and Aeronautics
- Tower Building Challenge
