

Acceptable Use Policy

Grades 7 to 12

The School has place restrictions on what can be accessed using the School's ICT Systems. This document has been prepared to explain what the expectations are for anyone using the School's ICT systems (Computers, Laptops, Email, Internet, Wi-Fi Access etc).

Some guiding principles

- All users of DSC networking, software and hardware systems are required to sign an Appropriate Use Agreement.
- The School's ICT system and resources must only be used for educational purposes.
- The School will monitor usage of School systems with automated and manual checks of logs and traffic.
- The use of the School's ICT systems is a privilege, not a right.
- Inappropriate use will result in the cancellation of ICT privileges and possibly other disciplinary action.
- School administration will decide what inappropriate usage is.
- The School will audit all School Systems for policy violations.
- The School will cooperate with government officials concerning any illegal activities conducted through the School's ICT systems.
- The School may report serious or criminal activities to the Computer Crimes Unit of the Hong Kong Police Department
- The School may report serious copyright violations to the appropriate agencies
- Users will not attempt to access another user's account
- Users are accountable for access to the system by his or her account
- Users must demonstrate digital citizenship through the appropriate use of technology, as outlined in schools' codes of conduct
- Passwords are to be kept safe, secret and secure.
- All community members are responsible for guarding against the misuse or abuse of technology by reporting to a teacher, the Vice Principal, or the Principal any misuse of technology, including cyber bullying, use of another login credentials, copyright infections, etc.

Privacy Expectation

- Users should have limited privacy expectations when using the ICT systems at the School. The School will attempt to keep the contents of personal folders and email secure and confidential. Users need to be aware that privacy on the Internet and email systems is not absolute.
- The School cannot guarantee the confidentiality of information stored on the network or School systems. This information may be seen by authorized personnel as they are carrying out routine maintenance, answering a service call, or other job related tasks.
- User access of the School's ICT systems requires a user account. This will enable individual users to be identified and his or her access traced.
- Students will be limited to 1 mobile device (laptop) joining the School's network.

- Students will be identified only by his or her first name on Internet sites accessible by the public.
- Students may be identified by his or her first and last name on School internal (Google Classroom) sites.
- Users will not disclose personal contact information over the School's systems
- Users will not disclose names and personal contact information about other students over the ICT systems
- Users will not forward a message that was sent to them privately without permission of the person who sent them the message
- Users will report any inappropriate use of email, data or unauthorized technology to a teacher, Vice Principal, or Principal

Technology Protection Measures

The School has set up several technology protection devices to help secure the ICT systems used by students. These systems include a web filter, an email SPAM and profanity filter, a firewall, and anti-virus systems. These systems remain on at all times when users are accessing internal and external resources. The log files and alerts produced by these systems can be used to identify inappropriate usage the School's ICT systems.

All students are responsible for the care, maintenance, anti-virus system protection, and security of their devices—the School is not responsible for the replacement of lost, stolen or damaged items.

Plagiarism and Copyright Infringement

It is the aim of the School that all students respect and follow laws protecting copyright material. The School does not condone the illegal use or reproduction of material protected by copyright. Students who willfully disregard this policy do so at their own risk and assume all liability.

- Students own the copyright to the work they create.
- Users will not use technology to plagiarize works.
- Users will respect the rights of copyright owners.

Email Usage and Monitoring Policy

The School provides email accounts to users primarily for the communication between students and staff. The School does allow reasonable and responsible use of email accounts for non-school or personal purposes on the expressed understanding that such usage will be appropriate. The School's email policy must be followed. If the email policy is not followed the user will have his or her email account closed.

Email Appropriate Use Policy - The following Email usages are *not permitted*:

- sending defamatory or indecent messages (containing obscene, profane or rude language)
- sending or distributing unlawful materials
- distributing or sending personal data (name, address, phone number, assessment marks, etc) about other people
- distributing or sending sensitive or confidential information
- distributing or sending unsolicited bulk mails or data that function in a malicious manner
- performing any unlawful activities
- sending SPAM messages, chain letters or mass emails
- harassing another user or person

- students must not use personal e-mail accounts (Hotmail, Yahoo mail, Gmail) during the school day
- excessive use of email by a user may raise a reasonable suspicion that the user is using electronic mail in violation of School policy
- Instant messaging programs/chat programs must not be used in class without permission from the teacher
- students will not check or reply to email messages while in class, unless given permission by the teacher
- users must not forward a messages sent to them privately without permission of the person who sent them the message

Respecting Privacy Rights

- Student users must not intercept email communications meant for others.
- Student users must not assist others in intercepting email communications meant for others.

Smartphones and Earbud/Headphone Usage Policy

The school appreciates and understands the need for secondary students having a smartphone. However, research is demonstrating that they can have a negative impact on learning and function more as a distraction during instructional time. As such, please note that if your child brings a smartphone to campus, it must be switched to silent mode and kept in their knapsack/school bag. Smartphones cannot be used during class transitions, recess, lunchtime ECAs, or walking around campus. Smartwatches with capabilities similar to a smartphone, such as making phone calls, searching the internet, taking video and/or photos must be placed in your child's school bag during the day.

In order to ensure safeguarding of all students, smartphones must never be brought to the washroom. If a student takes their phone to the washroom, this will result in a 5-day removal of phone privilege. On the second offence, their parents will need to collect their phone from the school on the day of the incident. **If photos and/or videos are taken in washrooms, disciplinary action will result with immediate suspension and possible expulsion from the school.**

Students may use their own smartphones/smartwatches for educational purposes if explicit approval is given by the class teacher for the amount of time or for the task specified by the teacher only.

In addition, students are generally not permitted to wear earbuds and headphones on campus, including entering the building and walking in the hallway between classes. There are a few exceptions to this rule:

- Educational Use – teachers will permit the use of earbuds or headphones if there are educational benefits, for example, writing the OSSLT where text-to-voice can be utilized.
- Lunch time on campus - students may use a single earbud or headphone (with one ear not covered) when eating lunch in the learning commons or Poet's Café.

AI Usage Policy

This AI Usage Agreement outlines the terms and conditions for using artificial intelligence (AI) systems and tools at DSC International School. All students must agree to and abide by these rules in order to access and use AI technologies provided by the school.

1. Educational Purposes Only
 - AI systems and tools provided by the school must only be used for legitimate educational purposes.
2. Responsible and Ethical Use
 - Students must use AI responsibly and ethically. This includes respecting intellectual property rights, maintaining data privacy and security, and avoiding any misuse or abuse of the technology.
3. Honesty and Academic Integrity
 - Students must be honest about their use of AI and not try to pass off AI-generated work as their own. Using AI to cheat or plagiarize is considered academic dishonesty.
4. Supervision and Guidance
 - Students must only use AI under the supervision and guidance of teachers. Teachers will set the guidelines and requirements of AI use in all assignments. If the teacher states no AI is permitted, this must be adhered to otherwise academic honesty and integrity will be breached.
5. Acceptable Content and Outputs
 - Students must ensure that any content or outputs generated using AI are appropriate, respectful, and aligned with the school's values and policies. Producing harmful, discriminatory, or explicit material is prohibited.
6. Security and Privacy
 - Students must take appropriate measures to protect the security and privacy of any data or information used with AI systems. Sharing login credentials or accessing restricted AI tools is not allowed.
7. Reporting Misuse or Concerns
 - Students must report any misuse of AI or concerns about its use to teachers or school administrators immediately.

The School is committed to respecting the reasonable expectation of privacy by its ICT users. The School also is responsible for operating, maintaining, and protecting its ICT systems. To accomplish this it is occasionally necessary to intercept or disclose email messages. The School may use content monitoring systems, message logging systems, or other tools. By using the School's systems, users consent to permit all information they store on the School's systems to be divulged to law enforcement agencies or reviewed, if suspected of appropriate use violations, at the discretion of the School.

No guarantee of message privacy

The School cannot guarantee that email messages will be private. Email can be forwarded, intercepted, printed, and stored by other people. Email messages can be accessed by people other than the intended recipients. Because messages can be stored in backups, electronic communications actually may be retrievable when a traditional paper letter would have been discarded or destroyed. Be very careful about the topics covered in email messages.

Content of messages

Sexual, ethnic, and racial harassment is strictly prohibited. Users must not use profanity, obscenities, or derogatory remarks in email messages. As a matter of standard practice, all School electronic communications must be consistent with conventional standards of ethical and polite conduct. Users who receive offensive unsolicited material from outside sources or another user should report the incident to the IT Department.

Statistical Data

The School may collect statistical data about its email system. Using such information, technical support personnel monitor the use of electronic communications to ensure the ongoing availability, reliability, and security of these systems. The School may employ computer systems that analyze these types of statistical information to detect unauthorized usage, denial of service attacks, and other problems.

Purpose of Monitoring Email Usage

The School may use automated software to keep and monitor logs of email usage for the following purposes:

- to facilitate the efficient provision of service to customers
- to maintain a stable email service environment for communications
- to provide information for management to ensure the proper utilization of company's resources
- to ensure the compliance of users with DSC's email usage and Personal Data Protection policies

Email Scanning and Monitoring

Every email message that passes through the server will be scanned for computer viruses, worms, and executable files that could pose a threat to the security of the network. Infected email will be deleted.

The School shall scan the content of every email message that passes through its servers based on a predetermined criterion. If the message does not pass the criteria, the message will not be delivered to the user.

The School reserves the right to log all out-going and in-coming emails. The email log contains the email addresses of the sender or recipient, the date, time, and message header information. Copies of emails are also stored in network mail servers. The School reserves the right to access the contents of all School-related emails held in a user's mailbox(es), at any time, even during periods when users are absent from work. *Random checks may be conducted to ensure the conditions of use of email facilities are observed.*

Acceptable Use Policy

In order to ensure a healthy educational environment at DSC the following must be avoided when using technology on Campus.

- playing games on laptops during instructional time
- using a laptop or internet access during class time without the approval of the class teacher
- attempting to gain unauthorized access to the School's ICT system
- attempting to hack into another person's computer or computer system
- going beyond authorized access level
- knowingly posting false or defamatory information
- accessing another user's account or files without permission
- disrupting the computer network performance
- destroying data by spreading computer viruses or deleting information
- posting information that could cause damage or harm to others if used
- using the School's system to engage in an illegal act
- engaging in personal attacks, including discriminatory attacks
- sending or displaying offensive messages or pictures
- intentionally damaging computers, computer systems, or computer networks
- intentionally infecting computers with viruses
- using internet P2P sites for downloading or accessing material posted on the internet

- making anonymously posting on the School Google Classroom sites
- posting any material that is knowingly false, misleading, or inaccurate on the School Google Classroom sites
- using profanity on the School's Google Classroom sites
- posting content/web link that is obscene, sexually oriented, or sexually suggestive on the School's Google Classroom sites
- posting material without the permission of the copyright owner on the School's Google Classroom site

Due Process

All infractions or suspected infraction of the School's Appropriate Use Policy will be handled in accordance to the School's Discipline Policy. Details in regards to this Policy may be found in the Parent and Student Handbook.

(Please keep these pages and return the next page to the Secondary Office)

Student Agreement

I have reviewed, understood, and agree to both the Appropriate Use Policy and the Academic Honesty and Artificial Intelligence in Education. I also recognize that the laptop is owned by my parent(s), not by me. This means that all decisions related to the operation of the laptop at home are made by my parent(s). Such decisions include but are not limited to: times of day when I can use the laptop; which programs can be installed on the laptop; how often I can use the laptop for playing games, watching videos, and using social media; and where the laptop should be used.

When at school I agree to follow the School's Appropriate Use Policy and the instructions given by my teachers.

Student Name: _____ Signature: _____ Date: _____

Parent or Guardian Agreement

As the parent or guardian of this student, I have read the School's Appropriate Use Policy. I agree to support the rules contained in this Policy at school and at home. I allow for my child's photo to be used in School based platforms/publications, and to issue all necessary ICT user accounts so my child can access the School's ICT systems and the Internet. I also give permission for the teacher to create an account for my child when a web-based tool is needed. I understand that this may involve an account on 123Design, Adobe Spark, Biodigital Human, BrainPop, Canva, Code.org, EdPuzzle, GoAnimate, Google Classroom, Google CS, Google Earth, Haiku Deck, iMotion, IXL, Kahoot, Newsela, NoRedInk, Padlet, Piktochart, Popplet, Powtoon, Prezi, Quiver, ReadTheory, Scratch, Socrative, Storybird, Squirrel, TinkerCad, Turnitin, Weebly, and YouTube.

I understand that should my son or daughter commit a violation his or her access privileges may be revoked, he or she may be suspended or expelled from school, and/or appropriate legal action taken. I understand that the School is not liable for any loss or damage of personal devices brought to school.

Parent Name: _____ Signature: _____ Date: _____

PICS: The information provided on this form will be used for the purposes of:

- i) processing a student application for a school user account;
- ii) maintaining a file of student and parent agreement to the policy; and
- iii) maintaining a file of parental permission for the establishment of web based user accounts for students.
